

## Instant freshness for your home

Mist & Refresh is a new aerosol air freshener which, unlike other air fresheners, combines odour removal with a light fragrance to truly refresh your home.

The patented Febreze odour elimination technology traps and neutralises everyday bad smells rather than just masking them. Plus, the mist itself is water-based and specially designed to gently release a light and subtle fragrance.

Mist & Refresh is different from other air fresheners as it contains a nitrogen propellant (nitrogen is 80% of the air we breathe). Combined with a bespoke trigger system, this creates larger water droplets in the mist giving a lasting scent experience.

Available in Blossom & Breeze, Cotton Fresh, Morning Dew and limited edition Apple Spice, Mist & Refresh instantly gives you that lovely feeling of throwing open your windows and breathing in the freshness.
